

QA Results Table

Comprehensive Verification Log Checklist

ID	Screen / Component	QA Check	Expected Result	Pass/Fail	Priority	Status
QA-01	Main StudyPlanner	Overall layout matches approved desktop mockup	Layout, content hierarchy and controls match the approved 1440 px reference	Pass	Medium	Tested
QA-03	Co-requisite Warning	Warning appears when Studio is selected without its Bootcamp	Approved warning modal appears with the correct course-specific message	Pass	High	Tested
QA-04	Co-requisite Warning	Go Back button	Button is visible and returns the user without applying the attempted change	Not tested	High	Not tested
QA-05	Co-requisite Warning	Continue Anyway button	Button is visible and allows the student to continue with the change	Not tested	High	Not tested
QA-06	Co-requisite Warning	Non-blocking behaviour	Student can continue and save the plan despite the warning	Pass	High	Tested
QA-07	Co-requisite Warning	Colours, typography and spacing	Modal matches the approved developer specifications	Not tested	Medium	Not tested
QA-08	Eligibility Warning	Warning content and actions	Warning matches the approved design and remains non-blocking	Not tested	High	Not tested
QA-09	Clear All Confirmati...	Confirmation behaviour	Confirmation appears before all courses are removed	Pass	High	Tested
QA-10	Summer Semester	Semester position	Summer Semester appears after Semester 2	Pass	High	Tested
QA-11	Summer Semester	Visual consistency	Layout, buttons, typography and spacing match the approved specification	Pass	Medium	Tested
QA-12	Admin Portal	Overall layout	Header, toolbar, table and pagination match the approved mockup	Not tested	Medium	Not tested
QA-13	Admin Portal	Search and controls	Search, Columns, Add Course and Admin History controls are visible and usable	Pass	Medium	Tested
QA-14	Admin Portal	Validation feedback	Invalid or missing data produces clear field-level feedback	Not tested	High	Not tested

Notes (Sprint 2 Week 3)

For developers to refer to

ID	Notes	Screenshot
----	-------	------------

- N-01
- Co-requisite warning banner
 - The co-requisite warning is still only appearing inside the course/column box.
 - It should appear as the designed warning banner/modal.
 - The warning should include “Go Back” and “Continue Anyway” buttons.
 - Continue Anyway should keep the warning non-blocking.

Semester 1 (Year 1)

Total Credits: 24

⚠️

Corequisites not met

COSC2803 must be taken with COSC2801.

⊗

Underloading

24 of 48 credits. Taking fewer needs Program Manager approval.

Core

COSC2803 Java Programming Studio

Corequisites: COSC2801

⚠️

Java Programming Studio needs a corequisite: COSC2801 — Java Programming Bootcamp. Plan it in this semester or an earlier one to avoid this warning.

+ Add Course

- N-02
- Programming Project 1 eligibility warning
 - Programming Project 1 can currently still be selected without displaying the required eligibility warning.
 - The eligibility warning should appear when the student does not meet the required conditions.

Semester 1 (Year 2)

Total Credits: 12

⊗

Underloading

12 of 48 credits. Taking fewer needs Program Manager approval.

Core

COSC2408 Programming Project 1

Prerequisites: (COSC2299 OR COSC2804) AND ISYS1118

+ Add Course

Move to Next Semester →

N-03

Dropdown alignment

- There are some minor alignment inconsistencies in the dropdown list.
- To simplify the implementation, we can use the local machine/browser's default dropdown styling instead.

MATH2466 Introduction to Mathematics for Computing12 credits

More Available Courses - Core

COSC2123 Algorithms and Analysis12 credits

Requires (COSC2391 OR COSC2802)

COSC2802 C++ Programming Bootcamp12 credits

Requires COSC2801

COSC2960 Foundations of Artificial Intelligence for STEM12 credits

OENG1235 Innovation Ecosystem and the Future of Work12 credits

INTE2625 Introduction to Cyber Security12 credits

More Available Courses - Program Course

COSC2673 Machine Learning12 credits

Requires MATH2411 AND COSC2803

N-04

Admin Portal

- The approved Admin Portal UI/UX has not been implemented yet.
- The implementation should follow the Admin Portal design handoff/mockup.
