Sprint 3 – Final Usability Testing & Visual QA Report

Project: Group 62 – StudyPlanner
Role: UX/UI Designer
Testing Method: Moderated Usability Testing and Visual QA
Participants: 3
Overall Outcome: Successful

1. Testing Objective

The final testing focused on making sure the StudyPlanner website was easy to use, worked as expected, and followed the approved Figma designs.

The testing covered the full user journey, including course selection, eligibility warnings, co-requisite warnings, summer semester planning, credit point tracking, and downloading the study plan.

2. Final User Testing

Three participants completed seven tasks covering the main features of the StudyPlanner website.

Task	Participant 1	Participant 2	Participant 3
Select study combination	Pass	Pass	Pass
Add and remove courses	Pass	Pass	Pass
Programming Project 1 eligibility warning	Pass	Pass	Pass
Co-requisite warning	Pass	Pass	Pass
Summer semester planning	Pass	Pass	Pass

Credit point tracking	Pass	Pass	Pass
Download study plan	Pass	Pass	Pass

Overall task completion rate: 100% (21/21 tasks).

3. Participant Feedback

Participant 1 – Mei Ann Goh (S4078465)

Found the website easy to navigate and the course selection process straightforward. The warning messages were clear, and the overall study planning process was easy to follow.

Participant 2 – Aiza Fontanilla (S4015983)

Completed the tasks without assistance. Found the updated warning messages easy to understand and appreciated the cleaner interface.

Participant 3 – Hui Wen Chew (S3993540)

Found the website visually consistent and easy to use. The summer semester controls were clear, and the overall navigation was straightforward.

4. Final Visual QA

The final website was reviewed against the approved Figma designs, focusing on:

- Main StudyPlanner dashboard
- Course selection and semester layouts
- Programming Project 1 eligibility warning
- Co-requisite warning messages
- Summer semester controls
- Credit point progress display
- Navigation buttons and download feature
- The interface was consistent with the approved designs, and no major visual issues remained.

5. UI Discrepancies and Fix Verification

Two minor UX issues identified during earlier testing were reviewed again.

Issue	Description	Final Status
UX-01	Repeated co-requisite warning banners made the interface look cluttered.	Fixed
UX-02	Summer Semester "X" button was incorrectly positioned.	Fixed

Both issues were resolved and reviewed during the final visual QA.

No further major usability or visual issues were identified.

6. Final QA Findings and Team Handoff

The final testing showed that the StudyPlanner website supported the complete study planning process successfully.

All three participants completed the assigned tasks, and the feedback was positive overall.

The final visual QA confirmed that the interface followed the approved Figma designs, with the previously identified issues resolved.

The testing results, UX findings, and final QA outcomes were documented and shared with the development team.

7. Conclusion

Overall, the final usability testing and visual QA were successful.

The website provided a clear and straightforward experience for students planning their courses. All key features worked as expected, and participants completed the full user journey without major difficulties.

With the identified UX issues resolved and no major outstanding problems, the StudyPlanner interface was ready for final delivery.
